Hiring Manager
Under Armour
San Francisco, USA

Dear Hiring Manager,

I am writing to express my interest in an entry-level IT Support position at your organization. I am currently pursuing a Bachelor of Science in Information Technology at Filamer Christian University, Inc., where I am developing practical knowledge in computer systems, troubleshooting, networking, and software applications.

I have hands-on experience from my work immersion at Advanced Specialty Learning Academy (ASLA) in Roxas City, where I assisted with computer preparation, software installation and updates, basic networking activities, IP configuration, printer setup, and basic computer and printer troubleshooting. I also passed the Computer Systems Servicing (CSS) NC II assessment, which strengthened my foundation in computer hardware and servicing.

As part of my academic work, I have contributed to projects that apply different areas of information technology. These include an Equipment Borrowing Management System developed with Django and MySQL, and an AR Hand and Face Tracker – Boss Fight project using Python, OpenCV, and MediaPipe. Working on these projects has helped me practice problem-solving, system development, testing, and learning unfamiliar technical tools.

I am willing to learn, patient when addressing technical issues, and interested in helping users resolve everyday computer-related problems. I would appreciate the opportunity to discuss how my education, training, and developing technical skills could support your team.

Thank you for your time and consideration.

Sincerely,

Jan Michael M. Unarce
BS Information Technology Student
